TYPE II AMBULANCE
2010 Mercedes Benz
Sprinter 2500 Hightop
144" Wheelbase

This unit style has become extremely popular. The dual folding seats are taking place of the traditional squad bench. The bench in reality is a dangerous place to travel and the requirements for today have changed. The forward seat provides a comfortable place for attendants to travel, and can remain seated and belted when seeing to patient needs. This is a perfect unit for long distance transport.

- **All LED Emergency Lighting**

- **Walk-thru**
- **Standup Longboard storage at side**
- **Locking Sharps Container**
- **Locking Drug Storage**
- **2-100 watt Front Mounted Sirens**
- **74.5 inches Headroom**
- **Upgraded Wheels**

This is a layout drawing of the cabinet and interior configuration of the two-seat car. The forward side seat is placed far enough back to allow for normal patient needs from a seated, belted position. This car is perfect for long-distance transport needs as medical staff in the rear can travel in a safe location.

Long-board storage is located at the side door in a stand-up position. This allows for quick and easy removal

The Oxygen Bottle Storage is located at the rear door and includes a removable door for easy change-out

This design layout includes generous cabinet space running full-height inside the car. Adjustable shelving on the top-cabinets and lockable storage under the seats.
